Professional Summary

Java Trainer and Technical Mentor with experience training students in Java, programming fundamentals, and problem-solving through TAP Academy. Proficient in OOP, Collections, Exception Handling, Arrays, Strings, Interfaces, and Java programming. Experienced in hands-on coding sessions, assessments, mock interviews, debugging, and technical interview preparation, with a strong focus on placement preparation and industry readiness.

Experience

TAP Academy (EdTech) July 2023 – Present
Technical Trainer & Developer *Bengaluru, India*

- Deliver Java training programs to students at multiple engineering institutions through TAP Academy.
- Train students in Java, OOP, Arrays, Strings, Exception Handling, Interfaces, Collections, and problem-solving.
- Conduct hands-on coding sessions, assessments, debugging exercises, mock interviews, and technical discussions.
- Mentor students in programming fundamentals, technical interviews, and placement preparation.

Global Academy of Technology
15-Day Java Training Program *Bengaluru, Karnataka*

- Delivered a **15-day Java training program** to students through **TAP Academy**.
- Covered OOP, Arrays, Strings,Collections, and Java problem-solving.
- Conducted hands-on coding sessions, problem-solving exercises, and assessments.

Adichunchanagiri Institute of Technology
20-Day Java Training Program – Ongoing *Chikkamagaluru, Karnataka*

- Currently delivering a **20-day Java training program** to students through **TAP Academy**.
- Training students in Java, OOP, Arrays, Strings, Exception Handling, Interfaces, and Collections.
- Conducting practical coding sessions, problem-solving exercises, and assessments.

Projects

Anthar-Jala Watch | ***Kotlin, Android Studio, Google Maps API, GenAI***

- Developed an Android-based groundwater monitoring application using Kotlin and Android Studio to address groundwater depletion, borewell failure, and sustainable water management.
- Implemented GPS-enabled borewell data collection and Google Maps heatmap visualizations to analyze groundwater stress based on water depth, yield, and digging year.

IoT-Guard | ***JavaScript, Python, HTML, CSS***

- Developed a next-generation IoT firewall using ESP8266 and ESP-NOW for secure peer-to-peer communication with AES-128 encryption and MAC-based authentication.
- Implemented real-time anomaly detection, data transfer, and firewall-based access control to prevent unauthorized device communication.

Education

S J C Institute of Technology Dec 2019 – June 2023
Bachelor's Degree, Computer Science and Engineering *CGPA: 8.64*

Technical Skills

Programming Languages: Python, Java, SQL, Kotlin, JavaScript
Databases: MySQL
Tools & Frameworks: Flask, OpenCV, Git, GitHub
